

VEHICLE UNDERCARRIAGE AND LIGHT ADAPTER SELECTION GUIDE

ABOUT THE SELECTION GUIDE

The Blizzard® Snowplows Vehicle Undercarriage & Light Adapter Selection Guide is a complete record of available undercarriage mounts and light adapters for use with Blizzard snowplows.

Additional undercarriage mounts and headlight adapters are continually being developed and will be added to this selection guide as they become available.

BLIZZARD CORPORATION RESERVES THE RIGHT, UNDER ITS CONTINUOUS IMPROVEMENT POLICY, TO CHANGE CONSTRUCTION OR DESIGN DETAILS AND FURNISH EQUIPMENT WHEN SO ALTERED WITHOUT REFERENCE TO ILLUSTRATIONS OR SPECIFICATIONS.

This guide provides recommended snowplow model applications for specific identified vehicle models. The use of this information by an authorized Blizzard dealer, or any person referencing or using this guide, for use in the process of a Blizzard snowplow installation, is solely the responsibility of that person or persons. Blizzard Corporation does not assume liability for damage to the purchaser's vehicle resulting from the attachment and use of a Blizzard snowplow. Vehicle risk is the sole responsibility of the purchaser. For additional information, review the Limited Consumer and Commercial Warranty documents at the back of this guide. These documents contain information regarding the term of warranty, warranty remedy, customer responsibility and warranty limitations for Blizzard Power Plow snowplows and Blizzard straight blade snowplows.

SAFETY

Review the Safety Precautions & Snowplow Undercarriage Installation Recommendations prior to performing an installation.

VEHICLE UNDERCARRIAGE MOUNTS

All truck-mounted Blizzard snowplows require a vehicle undercarriage mount to properly attach the snowplow to the vehicle. All available undercarriages (at the time of publication of this guide) can be referenced on the following pages.

In the event a Blizzard snowplow undercarriage mount does not fit, or requires modifications for proper installation (for a vehicle specified in the selection guide), complete the Vehicle Undercarriage Modification Notice form. Fax the document to Blizzard Engineering at 906-482-5445 or mail the document to: Blizzard Corporation Attn: Blizzard Engineering 95 Airpark Boulevard Calumet, MI 49913

LIGHT ADAPTERS

Review the Light Adapters to familiarize yourself with the construction of each Blizzard snowplow light adapter. The adapters are used to connect the vehicle headlights and original vehicle electrical harness to the main lighting harness on the snowplow vehicle electrical harness. *Note: Due to the differences in the construction of the headlight adapters, and the various make and model vehicles Blizzard snowplows can be installed on, light adapters are not included with the purchase of (or packaged with) a truck-mounted Blizzard snowplow.*

NOTE: The 64# on the lower left corner of the front cover is the part number for this manual. The letter in the box indicates the revision level.

SAFETY PRECAUTIONS AND SNOWPLOW UNDERCARRIAGE INSTALLATION RECOMMENDATIONS

WARNING: Always perform vehicle undercarriage installations with the keys removed from the vehicle's ignition. Properly tag the ignition switch to alert others work is being performed on the vehicle.

WARNING: ALWAYS attach a "DO NOT OPERATE" tag to the ignition switch and/or steering wheel in the cab of the vehicle to alert others that service or maintenance is being performed. If necessary, place additional warning tags around the vehicle. Serious injury or death could occur if the engine is started and the vehicle and/or snowplow are moved while performing service or maintenance.

WARNING: Most newer trucks are equipped with driver and passenger's side air bags. DO NOT remove, disable, or reposition any sensory equipment related to the safe operation of the air bags.

WARNING: Vehicles equipped with air bags are designed to be activated in a frontal collision equivalent to hitting a solid object or barrier at approximately 14 mph or more. Careless or high speed driving while plowing snow, which results in vehicle impact deceleration equivalent to or greater than the airbag deployment threshold described above, would deploy the airbag. Review your vehicle Owner's Manual for specific information regarding airbag deployment.

WARNING: ALWAYS follow the vehicle manufacturer's recommendations for installing snowplowing equipment.

CAUTION: Always follow the maintenance guidelines in a timely manner. Failure to observe maintenance guidelines may result in poor snowplow operation, increased component wear or possibly lead to part failure.

- Note: Vehicles equipped with Blizzard Snowplows are recommended to be equipped with the vehicle manufacturer's recommended snowplow options (i.e. Snowplow prep packages).
- Note: The installation, modification or addition of accessories to Blizzard snowplow undercarriage mounts and/or snowplows must be in compliance with published Blizzard snowplow recommendations and instructions.
- Note: For some snowplow applications, it may be necessary to use a form of load boosting device to accommodate a snowplow installation. The use of suspension airbags, booster springs, Timbren kits or other similar load boosting devices is the responsibility of the snowplow purchaser. The selection, installation and purchase of load boosting devices is also the responsibility of the purchaser.
- Note: For some snowplow applications, it may be necessary to use a form of ballast to provide increased vehicle traction or maximum braking and handling. The use of ballast, such as sand bags, etc., is the responsibility of the snowplow purchaser. The selection, installation and purchase of ballast devices is also the responsibility of the purchaser.
- Note: For proper undercarriage installation, the vehicle must be parked on a level surface.
- Note: The recommended push beam height for Models 680LT and 720LT Blizzard straight blade snowplows is 10-1/2" from the center of the push beam to level ground. DO NOT exceed 12-1/2" in height for this push beam installation. Review the diagram to the right.
- Note: The recommended push beam height for Blizzard snowplow models 760LT, 760, 800, 860 810 and 8611 is 12-1/2" from the center of the push beam to level ground. DO NOT exceed 14-1/2" in height for these push beam installations. Review the diagram to the right.
- Note: Routinely inspect all undercarriage mount hardware for tightness. Review the recommended maximum bolt torque chart in your Blizzard snowplow Operation & Assembly manual.
- Note: Routinely clean and lubricate all electrical plugs, headlight connections, ground and battery cables, solenoid connections and switch connections to prevent corrosion. Apply dielectric grease for every 25 hours of snowplow use. You may need to grease more frequently depending on your plowing environment.
- Note: Follow all maintenance guidelines indicated in your Blizzard snowplow Operation & Assembly manual.
- Note: Follow all safety and warning labels indicated on the snowplow and/or in your Blizzard snowplow Operation & Assembly manual.

The recommended push beam height for the 680LT & 720LT undercarriage assembly is 10-1/2" from the center of the push beam to level ground.

The recommended push beam height for all other truck-mounted snowplow models is 12-1/2".

DO NOT exceed 12-1/2" (680LT & 720LT Only) or 14-1/2" (All other models) in height for these undercarriage assemblies.

CAUTION: If your vehicle is equipped with oversize tires, they may come into contact with the undercarriage hanger plates when turning the vehicle.

The problem may be resolved by setting the steering stops on the vehicle. If this does not correct the problem, the original tires will need to be installed on the vehicle.

GENERAL INSTALLATION INSTRUCTIONS FOR ALL HEADLIGHT ADAPTERS

- 1** Prior to installing the headlight adapters, verify the original vehicle equipment is in proper working order. Test the vehicle headlights (high and low beam), turn signals and run lights. Verify fog lamps or other optional lighting equipment is also in good working order if so equipped.
- 2** Remove the existing vehicle headlight connector from the headlight.
- 3** Plug the headlight adapter into the vehicle headlight receptacle. Note: If more than one plug is present, match the colors of each connector (gray to gray, black to black, Chevrolet daylight running: clear to gray, etc.).
- 4** Connect the existing vehicle headlight connector into the headlight adapter.
- 5** Plug the black (or gray depending on headlight adapter construction), 5-pin connector on the headlight adapter into the 5-pin connector on the vehicle wire harness.
- 6** Verify the vehicle and plow headlights are in proper working condition, including the turn lights. Adjust the plow headlight beams as needed.

CONNECTOR/ADAPTER CROSS REFERENCE

LIMITED CONSUMER WARRANTY

This warranty covers defects in material and workmanship except as set forth below.

WARRANTED PARTY:

This warranty applies only to the "Original Purchaser" who purchased this plow from an Authorized Blizzard Dealer, for personal, family or household use.

TERM OF WARRANTY:

This Blizzard Power Plow snowplow is warranted for the following period:
Parts and labor are warranted for one year from date of purchase.

BLIZZARD CORPORATION'S WARRANTY REMEDY:

Blizzard Corporation will, at its sole discretion, repair or replace defective parts at no charge.

CUSTOMERS RESPONSIBILITY:

To obtain warranty service, the purchaser must return the defective snowplow to any Authorized Blizzard Dealer. The purchaser must verify the original purchase date. Transportation costs to and from the dealer will be the responsibility of the purchaser.

ITEMS NOT COVERED UNDER THIS WARRANTY:

This limited warranty does not cover the following:

1. Expendable parts such as cutting edges, plow shoes, hoses, fasteners, blade guides, paint finish, etc.
2. Any snowplow or part thereof which has been repaired or altered by anyone other than an Authorized Blizzard Dealer.
3. Any snowplow or part thereof which has been subject to neglect, misuse, accident, improper installation, maintenance, or storage. This includes, but is not limited to, corrosion of any electrical components.
4. Snowplows mounted on vehicles other than those for whom Blizzard Corporation has provided a specific undercarriage system.
5. Blizzard Corporation does not assume liability for damage to the purchaser's vehicle resulting from the attachment and use of a Blizzard Power Plow snowplow. Vehicle risk is the sole responsibility of the purchaser.

WARRANTY LIMITATIONS:

THIS WARRANTY IS OFFERED IN LIEU OF ANY OTHER EXPRESS WARRANTY.

THE DURATION OF ALL IMPLIED WARRANTIES, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO THE DURATION OF THIS WARRANTY.

BLIZZARD CORPORATION'S LIABILITY IS EXPRESSLY LIMITED TO REPAIR OR REPLACEMENT OF DEFECTIVE PARTS. BLIZZARD CORPORATION SHALL NOT BE LIABLE FOR CONSEQUENTIAL, INCIDENTAL OR CONTINGENT DAMAGES WHATSOEVER, EVEN IF DAMAGES ARE CAUSED BY THE NEGLIGENCE OR FAULT OF BLIZZARD CORPORATION.

State Laws: Some states do not allow exclusion of incidental or consequential damages or the limitations on how long an implied warranty lasts, so these limitations or exclusions may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

This warranty does not apply if you purchased your snowplow for other than personal, family, or household use. If purchased for other than personal, family or household use, refer to the Blizzard Power Plow Commercial Warranty.
