### **⚠ WARNING**

**New untitled vehicle installation of a snowplow requires National Highway Traffic Safety Administration altered vehicle certification labeling. Installer to verify that selected snowplow and ballast, if required, do not exceed GVWR or GAWR rating label and complies with FMVSS.**

### **⚠ WARNING**

**Do not exceed GVWR or GAWR, including blade and ballast. The rating label is found on the driver-side vehicle door cornerpost.**

## **ABOUT THE U/C SELECTION GUIDE**

The *Undercarriage (U/C) Selection Guide (USG)* is designed to help you determine the appropriate snowplow components for a particular snowplow vehicle application. The information published in this guide is based on Federal Motor Vehicle Safety Standards (FMVSS) and a "representative" snowplow vehicle as defined in this guide. The vehicle includes a combined weight of 300 lb for occupants in the front seat location.

This *USG* is for specific model year vehicles only and is listed on the front cover of this guide. This guide should be saved for future reference. New selection guides will be published for the upcoming model year and so on. The instructions on page 4 explain how to use the *U/C Selection Guide*.

The most current information can always be found by using the Power Match online selection guide on our Web site ([www.blizzardplows.com](http://www.blizzardplows.com)).

## **The "Representative Vehicle"**

Knowing that today's snowplow vehicles come in a variety of sizes and configurations (such as wheel base, engine size, and handling packages), Blizzard has defined a "representative vehicle" that contains the options most likely to appear on a typical snowplow application. The "representative vehicle" includes the following options:

- 4X4 Drivetrain (unless noted)
- Spare Tire & Wheel
- Automatic Transmission
- Rear Bumper
- Air Conditioning
- Full Fluids

**NOTE: If the vehicle in question does not match a vehicle listing in the *U/C Selection Guide*, or has options that differ from the "Representative Vehicle" as defined earlier, the ballast inquiry sheet must be filled out and submitted in order to determine snowplow availability and correct ballast amounts to maintain FMVSS compliance. Completed vehicle at no time shall exceed GVWR or GAWR.**

## **Snowplow Product**

Snowplows are considered motor vehicle equipment. The installer is ultimately responsible for determining and correctly labeling the vehicle with the addition of snowplow selection. No product selected and installed shall render inoperative the vehicle's safety compliance.

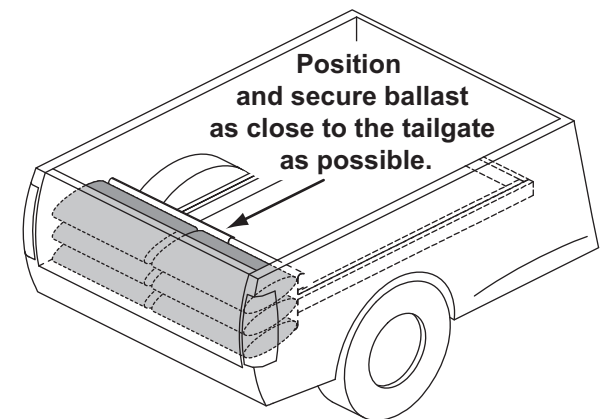

## **Product Changes**

All information is as accurate as we can determine but is subject to revision with additional or more complete information. Blizzard reserves the right under its product improvement policy to change construction or design details and furnish equipment when so altered without reference to illustrations or specifications used. Blizzard or the vehicle manufacturer may require or recommend optional equipment for snow removal.

## **Ballast**

When ballast is required it must be secured behind the rear wheels in a manner which prevents it from sliding during normal driving. Ballast shall not exceed 1000 lb.

Blizzard offers an optional ballast retainer kit (PN 62849) for this purpose.

**NOTE: Ballast recommended and its weight calculations assume the entire width of the bed is filled as close to the tailgate as possible.**

HOW TO USE THE U/C SELECTION GUIDE

Selection Example:

Acme Motors K1500S with POWER HITCH™ System

- 1. Go to the section for the appropriate manufacturer.
- 2. Starting at the left-most column, find the **model** and appropriate configuration for the vehicle. In this case, 4x4, Regular Cab, 6.5 ft. box, 4.8L V8 engine, 3950 Min. FGAWR.
- 3. Locate the **headlight conversion harness** part number for this vehicle: B29400-2. See the Headlamp Reference Guide in the back of the *Undercarriage Selection Guide* for more information.

**NOTE:** Not all applications require a conversion harness. If no harness is needed, the part number listed will be "n/a".

- 4. Locate the **undercarriage** for this vehicle: 31599. Refer to any footnotes concerning conditions or requirements. For this example there is one footnote: 1.
- 5. Locate the acceptable **blades** at the top of the table. Only those blades with ballast weights listed are valid applications. Three short dashes (---) indicates an invalid application. A question mark (?) indicates a ballast inquiry sheet must be completed.

- 6. For this example, there are four acceptable blades. Choose the 7600LT. This blade requires 340 lb of ballast.
- 7. To order a complete snowplow package, read down from the top of the selected blade column for appropriate part numbers. Be sure to select *one* control, either joystick, touchpad or hand-held. For this example, the part numbers would be:
  - B1761 (blade assembly)
  - 29070 or 29060 (module)
  - 96555 or 96550 (control)
  - B29400-2 (headlight conversion harness, from Step 3 – if not n/a)
  - 31599 (undercarriage kit, from Step 4)

Notes:

- 1. Ballast amounts are based on a "Representative Vehicle," defined in the vehicle selection guide instructions, and must be modified for all other configurations for axle and GVWR compliance.
- 3. Requires bumper notching.
- 45. Ballast amounts for Model 760LT and 810PP are calculated on reduced plow weights produced after March 2006 (Serial Number 0603 or later). See the weight and dimensional charts at the end of this guide for reduced, current and old plow weights.
- 46. 2007 model year "All New" style (2nd # in model # is 0 not 5) example: K10903. Refer to label in glove box for model number.

# 2008 Chevy/GMC

- Notes:**
- Ballast amounts are based on a "Representative Vehicle," defined in the vehicle selection guide instructions, and must be modified for all other configurations for axle and GVWR compliance.
  - Requires bumper notching.
  - Ballast amounts for Model 760LT and 810PP are calculated on reduced snowplow weights produced after March 2006 (Serial Number 0603 or later). See the weight and dimensional charts at the end of this guide for reduced, current and old snowplow weights.

- 2007 model year "All New" style (2nd # in model # is 0 not 5) example: K10903. Refer to label in glove box for model number.
- Snowplow prep package required until further notice.

# 2008 Chevy/GMC

- Notes:**
- Ballast amounts are based on a "Representative Vehicle," defined in the vehicle selection guide instructions, and must be modified for all other configurations for axle and GVWR compliance.
  - Requires bumper notching.

- Ballast amounts for Model 760LT and 810PP are calculated on reduced snowplow weights produced after March 2006 (Serial Number 0603 or later). See the weight and dimensional charts at the end of this guide for reduced, current and old snowplow weights.
- 2007 model year "All New" style (2nd # in model # is 0 not 5) example: K10903. Refer to label in glove box for model number.

# 2008 Chevy/GMC

**Notes:**

1. Ballast amounts are based on a "Representative Vehicle," defined in the vehicle selection guide instructions, and must be modified for all other configurations for axle and GVWR compliance.

45. Ballast amounts for Model 760LT and 810PP are calculated on reduced plow weights produced after March 2006 (Serial Number 0603 or later). See the weight and dimensional charts at the end of this guide for reduced, current and old plow weights.

2008 Dodge/Sterling

Notes:

1. Ballast amounts are based on a "Representative Vehicle," defined in the vehicle selection guide instructions, and must be modified for all other configurations for axle and GVWR compliance.

45. Ballast amounts for Model 760LT and 810PP are calculated on reduced plow weights produced after March 2006 (Serial Number 0603 or later). See the weight and dimensional charts at the end of this guide for reduced, current and old plow weights.

# 2008 Ford

- Notes:**
- Ballast amounts are based on a "Representative Vehicle," defined in the vehicle selection guide instructions, and must be modified for all other configurations for axle and GVWR compliance.
  - Ballast amounts for Model 760LT and 810PP are calculated on reduced plow weights produced after March 2006 (Serial Number 0603 or later). See the weight and dimensional charts at the end of this guide for reduced, current and old plow weights.

Notes:

1. Ballast amounts are based on a "Representative Vehicle," defined in the vehicle selection guide instructions, and must be modified for all other configurations for axle and GVWR compliance.

45. Ballast amounts for Model 760LT and 810PP are calculated on reduced plow weights produced after March 2006 (Serial Number 0603 or later). See the weight and dimensional charts at the end of this guide for reduced, current and old plow weights.

2008 Ford

Notes:

1. Ballast amounts are based on a "Representative Vehicle," defined in the vehicle selection guide instructions, and must be modified for all other configurations for axle and GVWR compliance.

45. Ballast amounts for Model 760LT and 810PP are calculated on reduced plow weights produced after March 2006 (Serial Number 0603 or later). See the weight and dimensional charts at the end of this guide for reduced, current and old plow weights.

- Notes:**
- Ballast amounts are based on a "Representative Vehicle," defined in the vehicle selection guide instructions, and must be modified for all other configurations for axle and GVWR compliance.
  - Removal of skid plate or splash guard required.

- Ballast amounts for Model 760LT and 810PP are calculated on reduced plow weights produced after March 2006 (Serial Number 0603 or later). See the weight and dimensional charts at the end of this guide for reduced, current and old plow weights.

# 2008 Toyota

**Notes:**

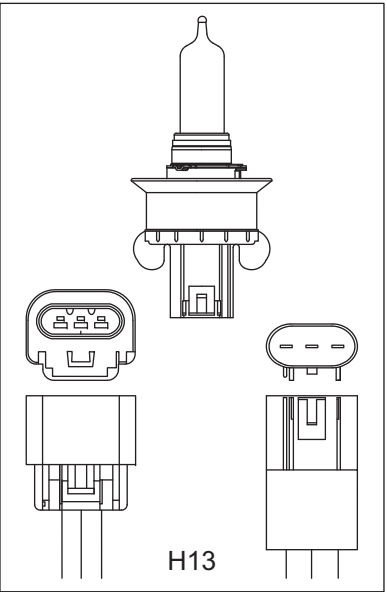

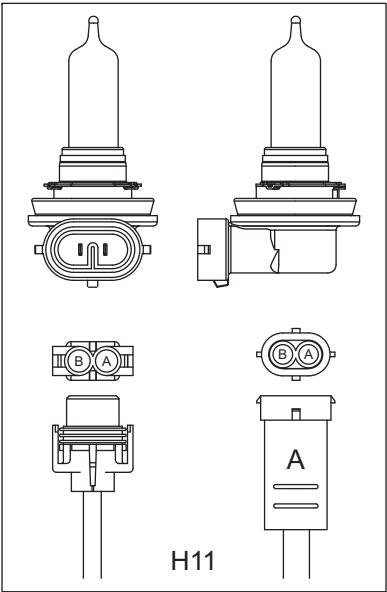

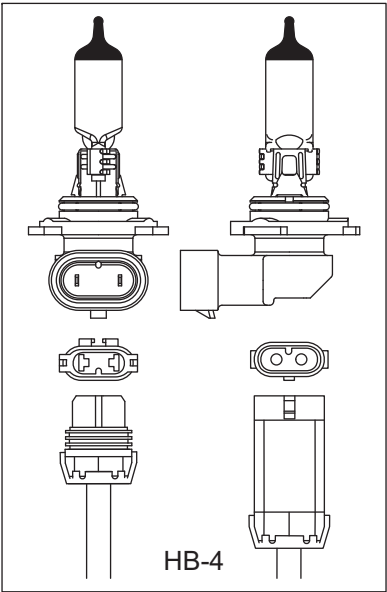

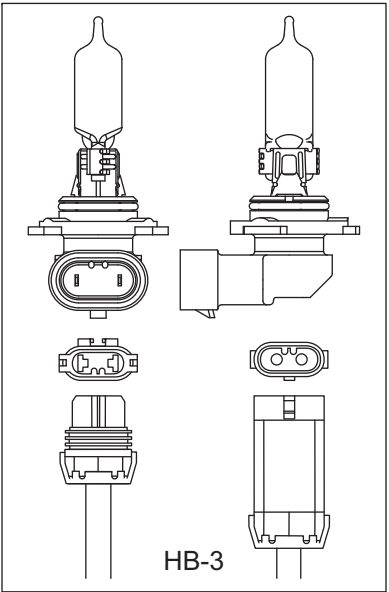

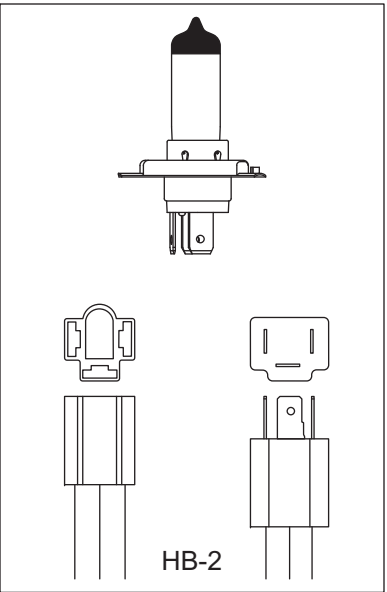

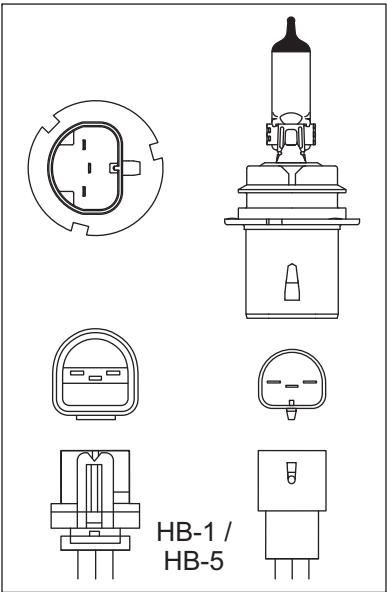

1. Ballast amounts are based on a "Representative Vehicle," defined in the vehicle selection guide instructions, and must be modified for all other configurations for axle and GVWR compliance.

45. Ballast amounts for Model 760LT and 810PP are calculated on reduced plow weights produced after March 2006 (Serial Number 0603 or later). See the weight and dimensional charts at the end of this guide for reduced, current and old plow weights.

\* These weights include the weight of the light tower when applicable.

## DIMENSIONAL DIAGRAM

### Variables:

X = Distance from center of front axle to hitch pin.

Y = Distance from hitch pin to CG of undercarriage.

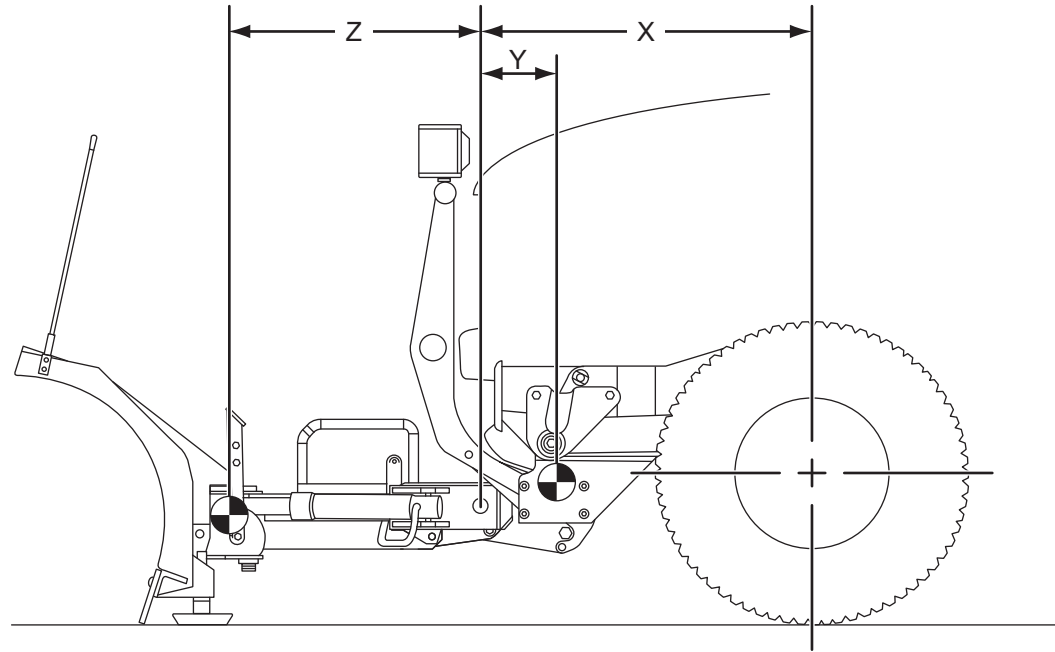

Z = Distance from hitch pin to CG of snowplow.

Available vehicle capacities for aftermarket equipment and components can be determined by using the above information along with information provided by the vehicle manufacturer's Body Builder Guides. Follow all requirements and recommendations as stated by vehicle manufacturer.

Blizzard and the vehicle manufacturer may require or recommend optional equipment for snow removal.  
See the BLIZZARD® *Undercarriage Selection Guide* for additional product information.

## UTILITY VEHICLE U/C KITS

### **⚠ WARNING**

**Do not exceed vehicle operative capacity including the blade. See vehicle rating label.**

**NOTE: The vehicle manufacturer may require or recommend optional equipment or modifications for snowplow installations.**

BLIZZARD® Undercarriage Kits are also available for your Kubota RTV900 4X4 or Bobcat 2200. These custom-fit kits allow you to plow snow with your utility vehicle using either a 680LT or 720LT BLIZZARD straight blade snowplow—the same snowplows that are available for your light truck or SUV.

Both snowplow models include hydraulic lifting and angling functions, in-cab controls and the

POWER HITCH™ attachment system. As with all BLIZZARD snowplows, a complete line of accessories and replacement parts is also available for these models.

A BLIZZARD snowplow on a utility vehicle is ideal for both residential and commercial applications, including sidewalks.

To order a complete snowplow package, order a blade assembly, control and undercarriage kit:

- B0680 (6'-8" blade) or B0720 (7'-2" blade)
- B62073 (joystick) or B62142 (touchpad)
- B35062 or B35101 (undercarriage kit, see right)

See your sales outlet for more information.
